Kier Agrees To Use Builder's Profile

The Kier Group has announced its support for the Builder's Profile in a move which will further reduce duplication amongst existing pre-qualification systems.

The Builder's Profile is an online service enabling companies to submit the same pre-qualification information to different contractors and clients without filling in a multitude of questionnaires. For Kier, signing up to the Builder's Profile means each of our regional divisions can accept and view pre-qualification information from any sub-contractor using the service whatever area of the country they are working in instead of sending paper questionnaires.

The Builder's Profile provides the Group with answers to all common pre-qualification questions at the touch of a button in whichever format is required, saving the expensive and time consuming task of extracting the information from paper questionnaires.

Head of procurement for the Kier Group Construction division, Andrew Hazlehurst, commented on service:

"Here at Kier we are committed to working in partnership with our supply chain and can see that, by accepting the information we require for our pre-qualification procedure from the Builder's Profile, we will become more efficient by creating a more streamlined process for our sub-contractors and for Kier."
